## BIKE, BOARDS & BLADES SAFETY

The summer season is filled with vacations, family gatherings, and that seemingly never ending to-do list we all make during the winter months; not to mention enjoying outdoor activities such as biking, rollerblading or skateboarding.

On average, 203 children ages 14 and under died in bicycle-related crashes each year.

An estimated 140,000 children are treated each year in emergency rooms for head injuries sustained while riding bicycles, skateboards, and roller blades. Bicycle helmets have been shown to significantly reduce the risk of head and brain injury. In fact, it is estimated that as many as seven out of every eight bicycle related fatalities among children could have been prevented with a bicycle helmet. Children ages 14 and under, account for 726 deaths, from pedestrian injuries. Of these, 576 died in motor vehicle-related incidents and the remaining 150 died in non-traffic related incidents. Sadly, 52 children died from pedestrian injuries; an additional 3,200 were treated for pedestrian injuries.

The Antioch Fire Department offers the following safety tips:

- Helmets that fit

A helmet should be worn every time you ride a bike, scooter, skateboard or in-line skate. It is also important to wear the appropriate helmet when skiing Or snowboarding. Use the following guidelines for purchasing and correctly wearing a helmet:

\* The helmet should fit comfortably and not be able to move when you jerk your head from side to side.

\* It should sit parallel to the ground, not tilted back, with about an inch (two fingers) between your eyebrows and the lower edge of the helmet.

\* Make sure the helmet straps are always buckled. The straps should fit snugly, but not too tightly. The sliding clasp on each side of the head should be situated just below the ears. You should be able to put a finger under the closed strap against your neck.

\* Getting the fit "just right" is a matter of trial and error, using the pads provided by the manufacturer and the strap adjustments. Try several helmets in the store; not all helmet styles will fit all heads equally well.

\* As parents, we must do our part to promote these behaviors to keep our children safe. Think about this...we make them wear seatbelts.

- Scooter, bike and pedestrian safety

Scooters, bikes, in-line skates and skateboards are associated with numerous injuries yearly.

\* Be sure that safety gear (wrist, elbow and kneepads) fits properly and does not interfere with the rider's movement, vision or hearing. Wrist pads are not recommended for scooter riders as they may affect their ability to maneuver.

\* Ride scooters and bikes only on smooth, paved surfaces and only ride during daylight hours.

\* Learn the proper hand signals and use them when you turn or stop.

\* Come to a complete stop before entering driveways, paths or sidewalks, then look left, right and left again for bikes, cars or pedestrians heading your way.

\* Teach crossing safety to children by example

As a parent or guardian, we should set a good example by always wearing a helmet. (Remember, actions speak louder than words!) Your children need you too.
